

Climate Facts and Myths Quiz

1. **True/False:** Climate change is a natural process, so human activities aren't responsible for modern climate change.
2. **True/False:** The concept of a 'carbon footprint' as a tool for individuals to help the environment was championed by oil companies.
3. **True/False:** Recycling is one of the most important weapons to fight climate change.
4. **True/False:** Climate change is responsible for extremely cold weather in some places.
5. **True/False:** Without drastic changes, humans are likely to go extinct from climate change within 100 years.
6. **True/False:** Oceans absorb more carbon dioxide (CO₂) than trees.
7. **True/False:** It is already too late to stop climate change, so we might as well enjoy burning fossil fuels.
8. **True/False:** We have already developed all the technology needed to combat climate change.
9. **True/False:** Oil company leaders knew as early as the 1950s that gasoline powered cars and the burning of fossil fuels would change the environment and threaten human health.
10. **True/False:** Climate change affects everyone around the world equally.
